

Vitor Bondezan

QA Engineer · Test Automation

Greater São Paulo Area, Brazil · vbondezan@gmail.com

[LinkedIn](#) [GitHub](#)

I'm a QA Engineer focused on quality as an engineering discipline: building automation that catches real risk early, not just checking boxes after the fact.

At REPAY, I work on the quality of a multi-tenant client web platform, building API and UI automation with Cypress and mentoring teammates on adopting it well. Before that, at Dock I automated Brazil's Pix payment products end-to-end — QR codes, transfers, MED, DICT — wiring test suites into CI/CD and covering performance testing with JMeter and monitoring with DataDog and AWS CloudWatch.

Experience

QE Analyst

Dec 2023 – Present

REPAY · Realtime Electronic Payments · Contract · Remote (United States)

- Own quality for an internal client web platform with multiple per-client configurations.
- Build API and UI test automation with Cypress to keep releases reliable across setups.
- Mentor teammates adopting Cypress, running training sessions and ongoing support.

QA Engineer II

Jan 2023 – Dec 2023

Dock · Remote (Brazil)

- Automated all Pix payment products — QR codes, transfers, MED, DICT — wired into a scheduled CI/CD pipeline.
- Ran performance testing with JMeter and picked up TypeScript and Python along the way.
- Monitored production workflows with DataDog and AWS CloudWatch; supported N2/N3 incident resolution.
- Generated and maintained test data via scripts, stored in PostgreSQL for reuse by other teams.

QA Engineer

Oct 2021 – Jan 2023

Dock

- Planned scenarios and test cases using BDD with Gherkin.
- Built automated test cases in Ruby, working daily with AWS (Lambda, CloudWatch, DynamoDB, SQS, Secrets Manager).
- Documented and tracked bugs in Jira, linking evidence via Zephyr.
- Worked within full Scrum ceremonies and agile rituals.

QA Analyst

E2E Coders · Freelance

Nov 2020 – Jan 2022

- Owned test planning, case surveys, and effort estimation with the squad.
- Wrote step-by-step and Gherkin (BDD) test scripts; applied black-box techniques for case discovery.
- Tested REST and SOAP APIs with Postman; tracked and retested bugs to closure.
- Built a UI automation framework from scratch with Selenium, Cucumber, and Java using the Page Object pattern.

Accounting Analyst II

LEDVANCE

Jan 2020 – Sep 2021

- Approved all team accounting entries for Brazil and Mexico; single point of contact for Latin America accounting projects.

Accounting Analyst Jr

LEDVANCE

Jan 2018 – Jan 2020

- Owned reconciliations, cost-center reclassifications, and monthly closing; prepared rolling forecasts and management reports for the board; supported internal and external audits.
- Completed a 20-day international assignment transferring closing processes to the Mexico operations center on behalf of headquarters in Germany.

Accounting Intern

LEDVANCE

Apr 2016 – Jan 2018

- Supported accounting routines: entry reclassification, forecast/budget assistance, provisions control, and reporting to headquarters.

Apprentice Student

CPTM

Mar 2015 – Mar 2016

- Selected via public exam for a youth apprenticeship program (SENAI); supported the finance and procurement department with invoice tracking and supplier spreadsheets.

Bilingual Technical Support Operator

Atento Brasil

Feb 2014 – May 2014

- Provided bilingual technical support for Apple software installs and configuration, ran functional tests, and documented processes for international use — an early, unplanned first taste of QA.

Bilingual Service Agent

Teleperformance

Aug 2013 – Feb 2014

- Provided bilingual sales support for domestic and international travel bookings on behalf of Expedia Brazil, handling back-office scheduling and payment-term negotiations.
